# Bribery, an international problem

Group of States against Corruption

**TUV NORD GROUP** 

**Excellence for your Business** 

# Introduction

Over USD 1 trillion is paid in bribes each year, World Bank estimation \$1,000,000,000

Disastrous impacts:

eroding political stability

increasing the cost of business

contributing to poverty

significant barrier to international trade, on a global level

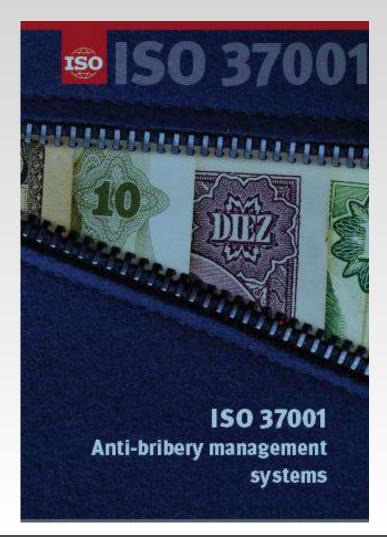

highly negative impact on employee morale, within an organization

penalties

Many governments have taken measures to address bribery through national laws as well as international agreements

TUV NORD GROUP

Many governments have taken measures to address bribery through national laws as well as international agreements such as the United Nations Convention against Corruption, but more can be done.

Institutional change and an anti-bribery culture within organizations can

contribute significantly to the fight against bribery and complement national and international measures.

Source: iso.org

Requirements of the standard

**TUV NORD GROUP** 

Excellence for your Business

# Why?

However, the law alone is not sufficient to solve this problem. *Organizations have a responsibility to proactively contribute to combating bribery. This can be achieved by an anti-bribery management system, which this document is intended to provide, and through leadership commitment to establishing a culture of integrity, transparency, openness and compliance.* The nature of an organization's culture is critical to the success or failure of an anti-bribery management system

**TUV NORD GROUP** 

Excellence for your Business

10

# BUT....

Conformity with this document cannot provide assurance that no bribery has occurred or will occur in relation to the organization, as it is not possible to completely eliminate the risk of bribery. However, this document can help the organization implement reasonable and proportionate measures designed to prevent, detect and respond to bribery.

# The International Standard applies to:

This document reflects international good practice and can be used in all jurisdictions.

It is applicable to small, medium and large organizations in all sectors, including public, private and not-for-profit sectors.

TUV NORD GROUP

# Why go for ISO 37001:16?

- Understand, evaluate and manage the risks of bribery
- Decrease the likelihood of a fine, prosecution or contract termination
- Mitigate the consequences
- Increase the level of involvement and awareness of personnel
- Increase the trust level of key interested parties (e.g. clients, business associates)

Anti- bribery management systems – Requirements with guidance for use

# 4 Context of the organization

# 4.5 Bribery risk assessment (4.5.1 – 4.5.3)

The organization shall undertake regular bribery risk assessment(s) (BRA), which shall:

- identify the bribery risks the organization might reasonably anticipate, given the factors listed in 4.1;
- analyze, assess and prioritize the identified bribery risks;
- evaluate the suitability and effectiveness of the organization's existing controls to mitigate the assessed bribery risks.

Policies and objectives shall be taken into consideration for establishing criteria and evaluating risks

BRA must be reviewed regularly at defined intervals, when significant changes occur and following possible incidents

# ISO 37001:2016

Anti- bribery management systems – Requirements with guidance for use

# 5 Leadership

# **5.1.1 Governing body**

- approves the organization's anti-bribery policy
- alignment of strategy and anti-bribery policy
- reviews the organization's anti-bribery management system (planned intervals)
- requires allocation and assignment of resources
- oversight over the implementation of the organization's anti-bribery management system by top management and its effectiveness

These activities shall be carried out by top management if the organization does not have a governing body.
